Activity 7: Influence Plan for Privacy-by-Design

Mapping: K2, A3 / LO2

Duration: 25 minutes

Deliverable: Stakeholder map, influence messages and RACI.

Goal

Build a stakeholder-specific influence plan that positions compliance as a workable design constraint and business enabler.

Real Case Study

Case: Marina Bay Sands - security-control omission during software migration

Date: 28 October 2025

Status: PDPC breach decision and $315,000 financial penalty

Official source: PDPC - Breach of the Protection Obligation by Marina Bay Sands

Published Facts

PDPC reported that 665,495 Marina Bay Sands patrons had personal data illegally accessed and exfiltrated in October 2023. During a large software migration, one identifier for the Art Science Friends webpage was omitted from security-policy coverage. A single employee manually compiled API configurations without a second-layer check, and the omission remained undetected for six months. PDPC imposed a $315,000 penalty.

Exercise Boundary

Use the published migration and control facts. Stakeholder objections, messages, RACI and pilot design are learner-created implementation proposals, not statements made by MBS or PDPC.

Questions

1. Which stakeholder groups should have influenced migration design and sign-off?
2. What behaviours must change in Product, Engineering, Security, Data and leadership?
3. What evidence would show complete policy coverage before and after migration?
4. Which residual-risk decision requires executive ownership?

Detailed Step-by-Step

1. Map each stakeholder by impact and influence.
2. Write their likely objection in their own business language.
3. Translate the legal requirement into role-specific behaviours and controls.
4. Prepare a value message, evidence point and support offer for each group.
5. Assign RACI roles for design, approval, implementation and exception handling.

6. Define one pilot, two success measures and an executive escalation trigger.

Worksheet

Requirement / issue	Business fact	Gap or impact	Decision / control	Owner	Deadline	Evidence

Acceptance Check

- ■ Messages are role-specific
- ■ Compliance/business trade-off addressed
- ■ RACI has one accountable owner
- ■ Pilot and escalation defined

Debrief

- What assumption had the greatest effect on your recommendation?
- What evidence would a director, auditor or regulator expect to see?
- What would you verify with qualified legal, tax or sector advice?

Sources

Educational activity only; verify current requirements with the relevant regulator and qualified advisers.

Real-Life Case Brief: Marina Bay Sands Software Migration

Regulator: Personal Data Protection Commission (PDPC)

Published: 28 October 2025

Procedural status: Breach decision and $315,000 financial penalty

Verified: 12 August 2026

Regulator-Published Facts

- Personal data of 665,495 Marina Bay Sands patrons was illegally accessed and exfiltrated in October 2023.
- During a large software migration, one identifier for the Art Science Friends webpage was omitted from security-policy coverage.
- A single employee manually compiled API configurations without a second-layer check; the omission remained undetected for six months.
- PDPC imposed a $315,000 financial penalty.

Classroom Boundary

Stakeholder objections, influence messages, the RACI and pilot design are learner-created proposals, not statements attributed to MBS or PDPC.

Official Evidence

PDPC - Breach of the Protection Obligation by Marina Bay Sands

Completion Checklist: Privacy-by-Design Migration Gate

- Inventory every endpoint, identifier, data flow and security-policy mapping.
- Use automated completeness checks plus an independent second-layer review.
- Assign one accountable migration owner and explicit security/privacy sign-off roles.
- Test before cutover and monitor for policy-coverage gaps after cutover.
- Record exceptions, expiry dates and executive acceptance of residual risk.
- Tailor messages for Product, Engineering, Security, Data and leadership.
- Define two measurable pilot outcomes and an escalation trigger.
- Separate learner-proposed stakeholder positions from published case facts.
