How to Use This Guide

This guide explains the course concepts and provides the detailed, step-by-step case activities. The slide deck stays concept-led; use this guide and the activity Markdown files when completing the exercises.

Important: This is educational material, not legal or tax advice. Requirements change. Verify the current regulator page and seek qualified advice where the facts are material or uncertain.

Course and Competency Map

Code	Approved statement	Course evidence
K1	Latest global developments, and regulatory and legal framework within which the organisation operates	Topics 1-2; Activities 1-4
K2	Organisation's business, environment and industry in which it operates	Topics 3-4; Activities 5-8
A1	Assess impact of changes in global developments and relevant business laws and regulations to organisation	Activities 1-5
A2	Drive decision making based on changes in laws and regulations	Activities 5-6
A3	Influence the relevant business units to adapt to new regulations	Activities 7-8

Compliance Foundations

Corporate compliance is a management system

- **Law:** Mandatory statutes, regulations and enforceable duties
- **Governance:** Who may decide, approve, oversee and challenge
- **Operations:** Policies, controls and evidence embedded in work
- **Assurance:** Monitoring, testing, reporting and remediation

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Legal compliance and regulatory compliance

Legal compliance: Broad duties that apply across business activities; Company, employment, tax, contract and privacy law; Courts and regulators may enforce consequences.

Regulatory compliance: Rules linked to a regulator, licence, sector or activity; Finance, healthcare, food, technology and safety overlays; Often includes reporting, inspection and licence conditions.

The continuous compliance cycle

1. Identify applicable duties
2. Assign owners and controls
3. Operate and retain evidence
4. Monitor change and test
5. Escalate, remediate and improve

Three accountability layers

- **Board / directors:** Set direction, challenge assumptions and remain accountable
- **Management / owners:** Translate obligations into resources, decisions and controls
- **Business functions:** Perform controls, keep evidence and raise issues early
- **Independent assurance:** Review design and effectiveness without owning the control

Outsourcing a task does not outsource accountability.

Directors must understand, challenge and authorise - even when advisers prepare the work.

A useful compliance evidence chain

- **Requirement:** The law, filing, licence or regulator expectation
- **Control:** The preventive or detective action that addresses it
- **Owner:** A named role with authority, capacity and deadline
- **Evidence:** Dated proof that the control operated and exceptions were resolved

Topic 1: Singapore's Legal and Regulatory Framework in a Global Context

Corporate duties, governance, registers, financial reporting and cross-border legal triggers

Mapping: K1, A1 / LO1

Singapore's business-law ecosystem

- **ACRA:** Entity records, directors, annual returns and financial reporting
- **IRAS:** Corporate tax, GST, employer reporting and record keeping
- **MOM / CPFB:** Employment standards, CPF and workplace safety
- **PDPC + sector regulators:** Personal data plus finance, health, food and technology overlays

How legal requirements reach the business

6. Acts passed by Parliament
7. Subsidiary legislation and regulations
8. Regulator guidance and filing systems
9. Court decisions and contractual duties
10. Company policies and controls

Five non-delegable director touchpoints

- **Records:** Keep proper accounting records and preserve them
- **Financial statements:** Ensure compliance and a true and fair view
- **Meetings:** Hold an AGM unless exempt or validly dispensed with
- **Returns:** File annual returns, including for dormant companies
- **Registers:** Keep officers, shareholders and controllers current

Director oversight: weak versus defensible

Weak oversight: Signs without reading or questioning; Treats the company secretary or accountant as the legal owner; Accepts late or incomplete evidence; Cannot explain the basis of the decision.

Defensible oversight: Understands key figures and legal deadlines; Challenges estimates and unusual transactions; Uses competent advisers but forms an independent view; Records questions, advice, decisions and follow-up.

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Annual corporate housekeeping

11. Confirm company particulars
12. Reconcile member and officer changes
13. Verify controllers and nominees
14. Review financial reporting status
15. Approve and file the annual return

Registers and key deadlines

- **Electronic registers:** Report officer/shareholder changes through Bizfile within 14 days
- **Private RORC:** Maintain controller information; update within 7 days after confirmation
- **Central RORC:** For applicable companies, lodge updates within 2 business days after the private register
- **Annual verification:** Send controllers a notice at least once a year to verify particulars

The 16 June 2025 register change

- **At incorporation:** Companies incorporated from this date establish RORC/ROND/RONS from registration
- **Private first:** Update the company's own register before the central filing
- **Central filing:** Submit relevant changes to ACRA within the prescribed short window
- **Control implication:** Incorporation and change-management checklists must be redesigned

Financial reporting: what directors must do

- **Read:** Understand the statements before authorising issuance
- **Challenge:** Question treatments that conflict with transaction substance
- **Learn:** Maintain enough current financial knowledge for high-level review
- **Resource:** Appoint competent people, robust controls and external help when needed

Annual return and tax return are different

ACRA annual return: Maintains the public corporate record; Covers officers, shareholders and company particulars; May include XBRL financial statements where applicable.

IRAS corporate income tax return: Declares taxable income and supporting tax positions; Includes ECI and Form C-S/C-S (Lite)/C obligations; Uses the Year of Assessment framework.

Global developments become local business issues when...

- **Customers:** The business serves or targets persons in another jurisdiction

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

- **Data:** Personal or operational data is transferred or accessed overseas
- **Supply chain:** Contracts import foreign standards, sanctions or reporting duties
- **Capital and people:** Investors, staff, directors or assets cross borders

Activity 1: Board Duties and Governance Gap Scan

Mapping: K1, A1 / LO1

Duration: 25 minutes

Goal: Identify director, record, reporting and register gaps; distinguish tasks that may be outsourced from accountability that remains with directors.

Deliverable: One-page governance gap scan and two-minute board briefing.

Scenario

Red Lantern Pte Ltd has a nominee director who signs documents without reading them, an outsourced accountant who is three months behind, and a share transfer that was never updated in Bizfile. The board assumes the service providers carry the legal responsibility.

Questions

16. Which facts indicate a legal or governance failure?
17. Which director duties are engaged and what evidence is missing?
18. What immediate containment actions are required?
19. What recurring controls would prevent the same gap?

Detailed Step-by-Step

20. Read the scenario once for the business story and a second time for compliance signals.
21. Create four columns: Requirement, Current fact, Gap/risk, Evidence needed.
22. Map each fact to ACRA director, financial-reporting or register guidance.
23. Classify each response as contain now, correct within deadline, or strengthen for future cycles.
24. Prepare a two-minute board briefing that states the issue, decision, owner and deadline.
25. Peer-review another group's response for unsupported assumptions or missing director challenge.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: All material facts mapped
- Check: Director accountability stated correctly
- Check: Owners/deadlines named
- Check: Evidence requirements explicit

Activity 2: Global Trigger and Regulatory Perimeter Map

Mapping: K1, A1 / LO1

Duration: 20 minutes

Goal: Show how customers, data flows, contracts, staff and suppliers can make global legal developments relevant to a Singapore business.

Deliverable: Regulatory perimeter map with owners and escalation rules.

Scenario

NexPort Solutions sells a Singapore-hosted SaaS platform to customers in Singapore, Malaysia and the EU. It uses overseas cloud support, employs remote staff and accepts enterprise contract clauses based on foreign privacy and security standards.

Questions

26. Which cross-border touchpoints create a monitoring obligation?
27. Which issues are Singapore baseline duties and which require foreign advice?
28. Who should own horizon scanning for each trigger?
29. What decision would require escalation to the board?

Detailed Step-by-Step

30. Draw the organisation at the centre of a page.
31. Add five spokes: customers, data, people, vendors and capital/contracts.
32. Write the relevant jurisdiction and business promise on each spoke.
33. Mark baseline Singapore obligations separately from possible foreign obligations.
34. Assign an owner and monitoring source to each legal trigger.
35. Write one escalation rule for a material change.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Five trigger categories covered
- Check: Singapore/foreign distinction clear
- Check: No foreign rule treated as Singapore law
- Check: Escalation rule is decision-ready

Topic 2: Industry-Specific Business Laws and Compliance

Tax, GST, employment, CPF, workplace safety, data protection and sector overlays

Mapping: K1, A1 / LO1

Build the compliance universe from business facts

- **Entity:** Company type, ownership, officers and lifecycle stage
- **Activity:** What is sold, promised, processed, imported or exported
- **People:** Employees, contractors, migrant workers and workplace risks
- **Data and sector:** Personal data, regulated products, licences and jurisdictions

Corporate income tax filing rhythm

36. Close the financial year
37. File ECI within 3 months unless a waiver applies
38. Prepare tax computation
39. File Form C-S / C-S (Lite) / C by the annual due date
40. Pay and retain evidence

Tax records must tell the transaction story

- **Source documents:** Invoices, receipts, contracts and supporting evidence
- **Accounting trail:** Ledgers, schedules and systematic transaction records
- **Cash evidence:** Bank statements and payment records
- **Retention:** Keep relevant records for at least 5 years from the relevant YA

GST-registered business responsibilities

- **Charge and account:** Apply GST correctly to standard-rated supplies
- **File and pay:** Submit returns and tax due on time
- **Invoice and display:** Use compliant tax invoices and GST-inclusive price displays
- **Records and changes:** Keep support, notify IRAS and account at deregistration

Manual filing and seamless filing

Manual hand-offs: Repeated re-keying between source systems and portals; Higher transposition and version-control risk; Evidence spread across email and local files.

#SFFS-enabled workflow: Accounting/payroll data flows to tax forms with review; Corppass authorisation and acknowledgement remain visible; Digital records can support adjacent ACRA/CPF/MOM duties.

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Who requires CPF contributions?

- **Singapore citizens / PRs:** Employees working in Singapore under a contract of service
- **Directors:** Company directors receiving wages may be covered
- **Flexible workers:** Part-time and casual employees are included
- **Connected persons:** Paid family members and concurrently employed staff may also qualify

Monthly CPF control

41. Validate employee status and wages
42. Calculate employer and employee shares
43. Approve payroll
44. Pay contributions by the required date
45. Reconcile acknowledgement and exceptions

Employer responsibilities under the WSH Act

- **Assess:** Identify hazards and implement effective risk controls
- **Provide:** Maintain a safe environment, machinery, equipment and processes
- **Prepare:** Establish systems for emergencies
- **Enable:** Give sufficient instruction, training and supervision

PDPA obligations as an operating system

- **Accountability:** Appoint a DPO and make policies/practices available
- **Purpose and consent:** Notify purposes and manage valid consent/withdrawal
- **Protection and retention:** Secure data and stop retaining it when no longer needed
- **Transfer and rights:** Manage overseas protection, access and correction

Notifiable data breach timeline

46. Contain and investigate
47. Assess significant harm and significant scale
48. Determine whether notifiable
49. Notify PDPC as soon as practicable and within 3 calendar days
50. Notify affected individuals and document response

Activity 3: Five-Agency Compliance Calendar

Mapping: K1, A1 / LO1

Duration: 25 minutes

Goal: Convert company facts into a calendar of ACRA, IRAS, MOM/CPF, WSH and PDPA responsibilities with evidence owners.

Deliverable: 12-month compliance calendar and evidence register.

Scenario

Harbour & Hearth Pte Ltd runs two cafes and an online shop. It is GST-registered, employs Singapore citizens, PRs and work-pass holders, stores customer loyalty data, and is preparing its first full financial year close.

Questions

51. Which obligations are event-driven, monthly, annual or incident-driven?
52. What source evidence proves each duty was met?
53. Where do two regulators depend on the same underlying record?
54. Which dates must be verified annually rather than hard-coded forever?

Detailed Step-by-Step

55. List the facts that make each regulator relevant.
56. Create calendar rows for obligation, trigger/frequency, owner, reviewer and evidence.
57. Add preventive reminders and a separate overdue escalation point.
58. Link tax and filing events to the underlying financial close process.
59. Add incident-driven events for safety and personal-data breaches.
60. Run a completeness check against the five regulator categories.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Five regulator categories present
- Check: Trigger/frequency accurate
- Check: Owner and reviewer separated
- Check: Evidence and escalation captured

Activity 4: Data Breach Notification Tabletop

Mapping: K1, A1 / LO1

Duration: 20 minutes

Goal: Practise containment, assessment, decision ownership, notification timing and evidence capture under the PDPA breach-notification framework.

Deliverable: Incident decision log, notification outline and remediation list.

Scenario

BrightCart's customer-support vendor emailed a spreadsheet containing 1,800 customer records to the wrong external recipient. The file includes names, contact details, order history and loyalty status. The recipient says the message was deleted but cannot provide technical proof.

Questions

61. What must be done in the first hour?
62. What facts determine significant harm or significant scale?
63. When does the three-calendar-day notification clock matter?
64. What records support the decision whether or not to notify?

Detailed Step-by-Step

65. Assign incident roles: coordinator, technical lead, DPO/legal, communications and executive sponsor.
66. List immediate containment actions without assuming deletion is proven.
67. Build a fact log separating known, unknown and evidence required.
68. Apply the notifiability test and document the decision owner.
69. Draft a six-line PDPC notification outline and an affected-person message outline.
70. Record remediation and vendor-control improvements for the post-incident review.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Containment precedes notification drafting
- Check: Clock described accurately
- Check: Known/unknown facts separated
- Check: Decision and evidence documented

Sources for this section

- PDPC - Required to notify the PDPC - https://www.pdpc.gov.sg/report-data-breach/before-you-report-a-data-breach-3/info

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Topic 3: Business Decision-Making in Response to Regulatory Changes

From regulatory signal to proportionate, documented and evidence-backed action

Mapping: K2, A2 / LO2

The SCAN decision model

71. Spot the legal change
72. Clarify applicability
73. Assess business impact
74. Navigate a decision
75. Verify implementation

Start with business facts, not a generic checklist

- **Business model:** Revenue streams, promises, channels and critical assets
- **Operating footprint:** Locations, customers, vendors, people and systems
- **Risk appetite:** What can be accepted, reduced, transferred or avoided
- **Decision rights:** Who recommends, approves, implements and challenges

Six impact lenses

- **People:** Roles, capability, workload and accountability
- **Process:** Workflow, approvals, exceptions and deadlines
- **Technology and data:** Systems, access, interfaces, records and security
- **Contracts:** Customer, supplier, employment and data clauses
- **Finance:** Cost, revenue, tax, provisions and insurance
- **Reputation:** Trust, regulator confidence and market access

Score compliance risk consistently

- **Likelihood:** How probable is failure given exposure and control maturity?
- **Impact:** Legal, financial, operational, safety and trust consequences
- **Velocity:** How quickly could harm occur or a deadline expire?
- **Detectability:** Would the organisation discover failure before the regulator/customer?

Control design hierarchy

76. Avoid or redesign the risky activity
77. Prevent failure through workflow and authority
78. Detect exceptions quickly
79. Correct and recover

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

80. Evidence operation and review effectiveness

Compliance options are business options

Poor framing: Comply or do nothing; Legal says no; Controls added after launch; Success measured by absence of incidents.

Decision-grade framing: Compare compliant design alternatives; Quantify cost, delay, residual risk and opportunity; Embed controls in the operating model; Define leading indicators and escalation triggers.

A board-ready decision memo

- **Decision:** What approval or direction is needed, by when
- **Requirement:** The duty, applicability analysis and effective date
- **Options:** Feasible choices with cost, risk and operational effects
- **Recommendation:** Selected path, residual risk, owner and milestones

Evidence that a decision was reasonable

- **Inputs:** Current law, regulator guidance, data and expert advice
- **Challenge:** Questions asked, assumptions tested and conflicts disclosed
- **Approval:** Minutes, authority, rationale and conditions
- **Follow-through:** Owner, deadline, resources, verification and exception closure

Regulatory change implementation

81. Read and scope
82. Design controls
83. Approve resources
84. Update systems and contracts
85. Train, launch and test

The lowest-cost control is not always the most proportionate control.

Choose the option that meets the duty and preserves business objectives at an acceptable residual risk.

Activity 5: Regulatory Change Impact Assessment

Mapping: K2, A2 / LO2

Duration: 25 minutes

Goal: Use the SCAN model to assess the effect of an ACRA register change on processes, systems, roles, evidence and third-party instructions.

Deliverable: Completed impact assessment and recommendation.

Scenario

A company incorporated after 16 June 2025 uses a standard incorporation checklist written in 2024. The checklist creates its controller and nominee registers 30 days later and has no annual verification or central-register update step.

Questions

86. What changed and which companies are affected?
87. Where does the old process fail?
88. What options can management choose?
89. What evidence proves the new process operates?

Detailed Step-by-Step

90. State the regulatory change in one precise sentence.
91. Identify affected entities, events and process owners.
92. Map impacts across people, process, technology/data, contracts and cost.
93. Score likelihood, impact, velocity and detectability of the current gap.
94. Compare at least two compliant implementation options.
95. Recommend one option with owner, milestones, residual risk and verification.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Applicability stated
- Check: All impact lenses considered
- Check: Options are compliant
- Check: Residual risk and verification included

Sources for this section

- ACRA - Company registers: requirements & deadlines - https://www.acra.gov.sg/manage/companies/legal-requirements-common-offences/maintaining-local-companys-information-registers/company-registers/

Activity 6: Board Decision Memo: Digital Filing Controls

Mapping: K2, A2 / LO2

Duration: 20 minutes

Goal: Frame a proportionate board decision that balances legal compliance, control quality, cost, implementation risk and operational benefit.

Deliverable: One-page board decision memo.

Scenario

The finance director proposes #SFFS-enabled accounting and payroll software. Operations prefers spreadsheets because the software subscription costs more, while the board is concerned about authorisation, data quality and reliance on one vendor.

Questions

96. What decision is required and by when?
97. What are the viable compliant options?
98. Which risks remain after the recommended option?
99. Which conditions should the board attach to approval?

Detailed Step-by-Step

100. Write the decision request in one sentence.
101. Summarise relevant filing and record-keeping requirements.
102. Compare manual improvement, phased adoption and full adoption.
103. Assess cost, error risk, authorisation, business continuity and evidence quality.
104. Select a recommendation and state residual risks.
105. Add approval conditions, owner, timeline and post-implementation control test.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Decision explicit
- Check: Options compared fairly
- Check: Business facts drive recommendation
- Check: Conditions and verification are specific

Topic 4: Influencing Business Units to Adapt to New Regulations

Stakeholder alignment, role clarity, communication, training and compliance culture

Mapping: K2, A3 / LO2

Map stakeholders by impact and influence

- **High impact / high influence:** Co-design the response and resolve trade-offs
- **High impact / low influence:** Listen, equip and provide escalation routes
- **Low impact / high influence:** Keep informed with decision-grade evidence
- **Low impact / low influence:** Use concise updates and monitor for change

Translate legal text into four business questions

- **What changed?:** A plain-language summary without unnecessary legal jargon
- **Why us?:** The business facts that make the requirement applicable
- **What must change?:** Specific behaviours, systems, approvals and evidence
- **What happens next?:** Owner, date, support, exception path and verification

Compliance as friction or enablement

Constraint narrative: A new legal burden; More forms and approvals; Compliance owns the problem; Launch is delayed until legal is satisfied.

Value narrative: Protects licences, market access and customer trust; Reduces rework through built-in controls; Business owns risk with expert support; Compliant design accelerates repeatable growth.

RACI prevents accountability gaps

- **Responsible:** Performs the control or implementation task
- **Accountable:** Owns the outcome and approves exceptions
- **Consulted:** Provides specialist or affected-function input
- **Informed:** Receives status, decisions and escalation outcomes

Role-based compliance learning

106. Identify decisions and behaviours
107. Segment roles by exposure
108. Use realistic scenarios
109. Practise and assess
110. Refresh after change or control failure

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Make it safe to surface problems

- **Channels:** Accessible reporting and advice routes
- **Protection:** No retaliation for good-faith concerns
- **Response:** Triage, investigate and communicate outcomes
- **Learning:** Use root causes to improve controls and training

Board reporting that drives action

- **Exposure:** New obligations, major changes and high-risk business activity
- **Control health:** Design gaps, operating failures and overdue actions
- **Incidents:** Root cause, harm, notification and remediation
- **Decisions:** Residual risks or resources requiring board direction

Leading and lagging indicators

Leading indicators: Obligations without owners; Upcoming deadlines and overdue training; Control-test failures and unresolved exceptions; Third parties without current due diligence.

Lagging indicators: Late filings and penalties; Notifiable incidents and complaints; Regulator findings or licence conditions; Loss, rework, customer churn and reputational damage.

A 30-60-90 day adaptation plan

111. 0-30: scope and stabilise
112. 31-60: redesign and pilot
113. 61-90: deploy and train
114. Test control operation
115. Report residual risk and improve

People support change when the requirement is clear, the design is workable, and leaders model it.

Influence combines evidence, empathy, role clarity and visible follow-through.

Activity 7: Influence Plan for Privacy-by-Design

Mapping: K2, A3 / LO2

Duration: 25 minutes

Goal: Build a stakeholder-specific influence plan that positions compliance as a workable design constraint and business enabler.

Deliverable: Stakeholder map, influence messages and RACI.

Scenario

NexPort's Sales and Product teams resist new customer-data controls. Sales fears slower onboarding; Product fears delayed releases; Security wants strict approval gates; the DPO needs comparable overseas protection for support access.

Questions

116. What does each stakeholder value and fear?
117. Which behaviours must change in each function?
118. What evidence will show the design works?
119. Which disagreement requires executive resolution?

Detailed Step-by-Step

120. Map each stakeholder by impact and influence.
121. Write their likely objection in their own business language.
122. Translate the legal requirement into role-specific behaviours and controls.
123. Prepare a value message, evidence point and support offer for each group.
124. Assign RACI roles for design, approval, implementation and exception handling.
125. Define one pilot, two success measures and an executive escalation trigger.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Messages are role-specific
- Check: Compliance/business trade-off addressed
- Check: RACI has one accountable owner
- Check: Pilot and escalation defined

Activity 8: 90-Day Compliance Operating Model

Mapping: K2, A3 / LO2

Duration: 20 minutes

Goal: Design a practical 30-60-90 day operating model covering ownership, calendar, controls, training, reporting, speak-up channels and assurance.

Deliverable: 30-60-90 day roadmap and monthly compliance dashboard outline.

Scenario

NovaCare Pte Ltd is growing from 20 to 80 employees and launching a digital service for healthcare clinics. Compliance tasks sit with different founders, deadlines are tracked in personal calendars, and employees do not know where to report concerns.

Questions

126. What must be stabilised in the first 30 days?
127. Which controls should be piloted before full deployment?
128. What should management and the board see each month?
129. How will the organisation know the programme is effective?

Detailed Step-by-Step

130. Inventory obligations by entity, people, data, workplace and sector.
131. Assign RACI roles and an executive sponsor.
132. Create a central calendar and issue/escalation register.
133. Select priority preventive and detective controls for the first pilot.
134. Design role-based training and a protected advice/reporting channel.
135. Define leading and lagging metrics, test cadence and board reporting.

Worksheet

Requirement / fact	Gap / impact	Decision / owner	Evidence / deadline

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Acceptance Check

- Check: Priorities risk-based
- Check: Owners and cadence clear
- Check: Training and speak-up included
- Check: Metrics test effectiveness, not activity alone
